

NORHAN ELSAYED

Flutter Developer | Software Engineer | Mobile App Developer

Email: ahmedelsayednn9@gmail.com | WhatsApp: +20 128 249 8336 | Zagazig, Egypt

PROFESSIONAL SUMMARY

Senior Flutter developer focused on building reliable, scalable, and user-centered mobile applications. Experienced in transforming ideas and visual designs into polished Android and iOS experiences with clean architecture, robust API integration, state management (Cubit), and highly maintainable code.

EDUCATION

Bachelor's Degree in Computer and Informatics

Zagazig University | Grade: 3.85 / 4.00

Academic Focus: Programming Fundamentals, Algorithms & Data Structures, Databases, Software Engineering, System Analysis & Design, Object-Oriented Programming, and Collaborative Team Projects.

PROFESSIONAL EXPERIENCE

Trainer in NTI | 2026 - Present

- Delivered specialized technical training and mentoring for learners in Flutter and mobile engineering.
- Explained programming fundamentals, state management (Cubit), REST API integration, and clean architecture.
- Guided students through hands-on development of production-ready mobile applications.

Member in IEEE Community - Flutter Developer | 2025 - 2026

- Actively participated in technical workshops, hackathons, and collaborative software projects.
- Built responsive mobile UI components and implemented clean state management solutions with Cubit.
- Collaborated across cross-functional teams to deliver practical and intuitive mobile features.

TECHNICAL SKILLS

- Mobile Development: Flutter, Dart, Cubit, State Management, Responsive UI, Clean Architecture
- Programming & Fundamentals: C++, Python, Data Structures & Algorithms, OOP, Databases (SQL/NoSQL)
- Tools & Workflow: Git, GitHub, REST APIs, Postman, Debugging, Performance Optimization, Teamwork

FEATURED PROJECTS

Flutter E-Commerce App | Flutter, Dart, REST API, Cubit

A complete mobile shopping application with product catalog, cart, secure checkout, and state management.

News & Explore App | Flutter, Dart, News API, Cubit

API-driven news application featuring category navigation, full-text search, offline caching, and bookmarks.

Mobile UI Concept | Flutter, Dart, UI/UX

Polished interactive mobile dashboard prototype demonstrating glassmorphism and modern Flutter widgets.
